Full stack developer

<https://portfolio-kappa-seven-37.vercel.app/>

Full stack developer with 4 years of experience 2 of them leading teams. I have worked with clients, gathered requirements and developed multidisciplinary projects.

Spanish (Native) English (B-2)

Experience

Analyst at Deloitte • January 2024 – Current

Apex | JavaScript | Salesforce | Jenkins | SCRUM | Lightning Web Components | Kevin Ohara trigger framework | Apex Enterprise Pattern | Separation of concern | Unit testing | MVC

January 2024 – March 2024 (Intern) / March 2024 – current (Analyst)

- Developed custom apex classes with their corresponding unit testing and employed design patterns such as Singleton, Factory
- Developed custom Lightning Web Components with JavaScript and using Salesforce Lightning Design system
- Developed custom landing pages/tabs/components for Salesforce applications
- Collaborated with clients to gather requirements, translating their needs into functional software solutions.
- Worked with multidisciplinary teams along with SCRUM methodology and Jenkins as part of the pipeline

Full stack developer at Packengers • April 2023 – December 2023

VueJs | JavaScript | Flutter | Angular | AWS EC2 | AWS SNS | AWS S3 | Docker | Google Firebase Push Notifications | Airflow | Matrix | Synapse | Django | Quasar | TypeScript | Python

- Deployed an AWS EC2 instance with a Dockerized Airflow Application synced with Github repo for automated workflows
- Deployed AWS EC2 instance with Dockerized Grafana app with Prometheus for monitoring our services
- Deployed AWS EC2 instance with Dockerized Synapse server with Matrix protocol and Nginx, Riot was used as the client
- Integrated AWS SNS with Google Firebase Push Notifications using a custom backend for sending notifications and receiving them on a Mobile App created with Flutter
- Developed and maintained scalable web applications using VueJs and Angular, ensuring a responsive user experience and along with MVC architecture.

Full stack developer at Centro de Desarrollo (partial time) • March 2020 – April 2023

VueJs | Quasar | React Native | React | JavaScript | TypeScript | Figma | MySQL | AWS | Docker |
Sequelize | Feathers | ExpressJs | Push Notifications | Firebase Cloud Messaging | Postman | Flutter

- Developed native mobile apps with native events like QR code scanning, push notifications and offline first design.
- Raised requirements with different clients understanding his needs and converting them in software functionality.
- Lead the development of Mobile apps with React-Native using MVC with Atomic Design methodology
- Lead the development of Web Applications using React/Webpack/NextJS using MVC with Atomic Design methodology
- Implemented data sending/fetching/display from APIS
- Developed backend applications with JavaScript, TypeScript, Python using RESTful API architecture.

Education

Software Engineer • Universidad Autónoma de Querétaro • 2019 - 2023
